VOL. 1, NO. 28.

Citizens Unanimously Favor Incorporation

A representative meeting of the citizens was held in the King George restaurant, on last Wednesday evening, and the first step towards incorporating into a village was undertaken. While the attendance might have been a little larger, the general opinion seemed to be all in favor of the step, in fact, not a dissenting voice was raised.

President Flewwelling of the Board of Trade, introduced the subject of incorporation, and on a motion was voted to the chair.

The question had evidently been thoroughly discussed beforehand, as every citizen signified his approval of the proposed step, all agreeing that the establishment of a village would be a step in the right direction.

As soon as the village is incorporated, the citizens will be called upon to elect a council of three, whose duties are numerous and pertain to the enforcement of the provisions in the Village Act, besides carrying on the business in connection with the village. The council have the power to charge a fee on any travelling consertrouranment company, entertainment or showman performing in the village; the taxation of pool rooms, dogs, &c. The powers of the council are also defined in regard to the regulations for the prevention of disease and fire; animals running at large, &c.

The village will also be in a position to tax all property within the limits, which will be about 640 acres. The estimated value of lots sold in the townsite of Mirror is approximately \$600,000, and which will be subject to a tax of 10 mills on the dollar. The revenue thus raised will be used to the best advantage in grading the streets of town and making other necessary improvements.

The members of the committee appointed to look after the preliminary arrangements are J. F. Flewwelling, N. H. G. Ruthven and H. J. Raymer, who at the conclusion of the meeting, met and drew up a petition to the Lieutenant Governor in Council.

Daily Mail Service a Crying Necessity

A strong and vigorous protest was made at the last Board of Trade meeting against the present semi-weekly mail service, and a committee was appointed to circulate a petition through the town and country, to be forwarded to the Postmaster General, praying for the establishment of a daily mail at Mirror.

There might be some excuse for the present system, provided we did not have daily train, and we can see no just cause of reason why a town the size of Mirror and a well-populated district tributary to the town, should be compelled to put up with the abominable service now in vogue. The increase in population and the receiving of small daily mail service are an absolute necessity.

It is over six months since the Post Office department advertised for tenders for the carrying of mail daily from the G. T. P. station and the Mirror post

office, and so far as the public is concerned, we are no nearer a solution of the difficulty than formerly. Even letters to the Department from the secretary of the Board of Trade requesting information about the daily mail have not even been acknowledged; business courtesy demands some kind of a reply at any rate.

The manner in which the Mirror mail is handled is a subject uppermost in the minds of the citizens of Mirror and the surrounding country, and when spoken of, which is frequently the case, it is mentioned with some degree of disgust.

This is not a personal question, but a public one, and the citizens of this community are entitled to some consideration.

The petition should undoubtedly receive the unanimous support of all who are in any way interested in securing a daily mail.

CHURCH CHIMES

Service will be held in the Methodist church here, next Sunday, May 12th, at 8 p.m.

Rev. L. R. McDonald, B. A., of Clive, chairman of the Local Council district, conducted the service in the Methodist church last Sunday. At the conclusion of the service Holy Communion was observed by the adherents. Rev. Mr. Donald is superintendent of the Lamerton mission.

Last Monday afternoon at 2 o'clock, the Quarterly official board meeting of the Lamerton Methodist mission was held at the home of Mr. Scudie, Manfred, Rev. McDonald, of Clive presiding.

A report of the work of the year's work, both spiritual and financial, was presented to the Board. The mission includes the churches at Mirror, Manfred, Watergren and Ruthven, the three last mentioned showing a surplus on hand.

The Board decided to change the name from Lamerton mission to the Mirror Methodist mission.

The annual district meeting of the Methodist church, will be held at Blackfald's on May 21 and 22. Geo. Rogers and H. C. Brewster are the delegates from Mirror mission.

The annual Methodist Conference of Alberta, will take place in McDougall's Methodist church, Edmonton, starting on May 27th. There are fifteen districts in Alberta, which will be represented by delegates appointed at the different district meetings. A number of the ministers will be transferred to new stations and a report of the year's work throughout the province will be made.

The Ladies' Aid of the Mirror Methodist church, met in the church building Thursday afternoon.

The wife of a Methodist minister in West Virginia has been married three times. Her maiden name was Partridge, her first husband was named Robin, her second Sparrow and the present one Quail. There are now two Robins, one Sparrow, and three Quails in the family.

One grandfather was a Swan and the other a Jay, but both are now a Bird of Paradise. They live on Hawke Ave., in Eggleston, Canary Islands, and the girl who wrote this article is a Lyre Bird and an interested relative of the family.

News From the Town and District

C. A. Ward, of Onahon, visited with J. A. and Mrs. Johnson for a day or so last week.

W. J. Kailee and Andy Rader were at Red Deer on Saturday.

J. H. Hermann left last week for six week's treatment at Bath. Mr. Hermann has been troubled a great deal with rheumatism, and word received from the patient states that he is already considerably improved in health.

The premium list of the Calgary Industrial Exhibition has been received. The fair is held this year from June 25th to July 5th.

Jas Steers and A. G. Suggett were Alteers visitors on Wednesday.

John Swanson, of Dianas, was a Mirror visitor over Sunday.

J. F. and Mrs. Flewwelling were visitors to the Capitol City on Monday. Mrs. Flewwelling remaining for a couple of weeks' visit with friends.

The yard at the Lamerton school has been cleaned up by the scholars and flowers planted around the school house. A 4-foot Pigeon wire fence now encloses the yard and building, and the premises present a very tidy appearance.

Mrs. J. A. Johnson spent last Friday and Saturday with friends at Dianas.

Williams Bros. have received instructions from the assignees of the Lamerton Mercantile Co. to close out the business, and for the next month or two will carry on a sale at reduced prices.

The license commissioners will meet in Edmonton on May 16th, to reconsider the application for an hotel license at Mirror. Meeding adjourned at 11 p.m.

W. G. Merkley was in Edmonton last week, on business in connection with the transportation of scholars from Mirror to Lamerton school.

The new addition to the Bon-Ton livery has received a coat of red paint.

Mah Young, of Edmonton, a partner in the King George restaurant was in Mirror Wednesday.

The McCormack Lumber Co., received a carload of lumber this week.

At the morning service in the Mirror Methodist Church last Sunday, Messrs. Flewwelling, Staples, Steers and Wiltsie sang the sacred song "Face to Face."

In the evening the same quartette gave several selections at the anniversary services in Ailx Presbyterian church. The songs, "Swing ye Gates" and "The Wayside Cross," were received with much appreciation by the congregation.

W. D. Cook has been confined to the house for the last few days, a strained back being the trouble.

Mrs. T. R. McCorkell gave an enjoyable birthday party last Tuesday afternoon, to which the visiting ladies were invited: Mrs. Chas. Francis, Mrs. McLaren, Mrs. H. H. Simpson, Mrs. J. A. Johnson and Mrs. Allen. The hostess received the hearty congratulations of all present.

A number of the buildings in town are considerably improved in appearance by a coat of paint.

H. Kiesel has painted his hardware store white, with black trimmings; J. F. Flewwelling's blacksmith shop is adorned a dark lead with brown as a trimming; T. R. McCorkell's office is painted white and green, and a sign placed on one side. There are several other buildings in town that would look 100% better if the paint brush was applied.

BOARD OF TRADE

The Board of Trade met last Tuesday evening, at J. F. Flewwelling's shop, with the President occupying the chair. The minutes of the last meeting were read and adopted. Correspondence was read and disposed of; many of the letters being enquiries from parties soliciting information regarding prospects of the town.

The much debated road question was again discussed and a committee was appointed to deal with the subject and try and arrange a final settlement with the farmers through whose property the road is proposed to be constructed. The committee named included President Flewwelling, J. N. Mitchell and N. H. G. Ruthven, and the Board bound themselves to support any action which they decided was for the best interests of town and the parties to be served by the opening up the road to the west of the town.

The prompt answering of correspondence was also a topic under discussion, and the secretary was authorized to send all letters of enquiry as soon as received; several of the members offering to give a helping hand when necessary.

H. J. Raymer and W. J. Good were appointed a committee to file out a petition for a daily mail service and forward to the Postmaster General at Ottawa. Meeting adjourned at 11 p.m.

NEW MEMBERS IN THE CABINET

Four new members of the Sifton Cabinet were sworn in on Saturday evening, May 4th, by His Honor, Lieut. Governor Bulyea. The swearing in took place at the office of the Lieutenant Governor at eight o'clock.

The new cabinet as sworn in on Saturday is as follows: Arthur Lewis Sifton, M. A., LL. B., D. C. L., C. E., K. C., Premier, Minister of Railways and Telegraphs; Charles Raymond Mitchell, M. A., B. C. L., G. E., K. C., Minister of Public Works; Archibald J. McLaren, Provincial Secretary; Duncan Marshall, Minister of Agriculture; Malcolm MacKenzie, M. A., K. C., Provincial Treasurer; Charles Wilson Cross, B. A., LL. B., K. C., Attorney General; John Robert Boyle, K. C., Minister of Education; Charles Stewart, Minister of Municipal Affairs.

The taking into the cabinet of Messrs. Cross, Boyle, MacKenzie and Stewart, will involve by-elections in the constituencies of Edmonton, Sturgeon, Claremont and Selkirk. The writs for the election were issued on Saturday night and allowing for the necessary notice of 23 days, the by-election will take place on May 27th. The writ for the by-election in the Cardston constituency, caused by the resignation of J. W. Woolf, was issued at the same time, and an election will take place in that constituency on the same day as the others.

BENEFITS FROM SNOW-FALL.

The advantages of a snow-
fall which muddies the streets
are not so apparent to the
townspeople as to the farmer.
But they are none the less real
and very important. Unless
the fields in the country yield
there harvest, it would make
little difference if the town's
streets were always muddy.
A snow-fall is the equivalent
of a rain-storm in the spring by
which nature produces a crop.
As long as the streets in town
remain muddy, therefore we
shall know that the land in the
country is drinking in the mois-
ture and storing it up for
the use of the growing crops. And
there was need of a moistening,
either now or a few days later.
The farmers were favored with

falling weather and the larger part of
this year's crop must be under-
ground. But fine seed-
weather does not make the best
of conditions for germinating the
seed. The bright sunshine
which dried the soil and made

it easy workable has been rob-
bing it of the moisture left by
the melting snow of winter and
thus depriving the newly
sown seed of one essential to
early growth. Now, by inter-
posing a period of clouds and
snow flurries and showers,
nature replaces the moisture and
provides again the conditions
absolutely necessary to early
"sprouting."

BE A BOOSTER

Do you know there are people
sitting around in every town,
growing like a broody chicken
and knocking every good thing?
Don't you be that kind of cattle,
because they are no use on
earth: be a booster and boost for
all you are worth. If your
town needs boosting, boost it,
don't hold back and wait to see
if some other fellow is willing,
sail right in—this country is
free. No one has a mortgage
on it, it is yours as much as his;
and if your town is shy on
boosters, get into the boosting
bit. If things don't seem to suit
you and the world seems a little
wrong, what is the matter with
boosting, just to help the thing
along. Because if things should
stop going, we would be in a
sorry plight; just keep that
horn blowing—boost with all
your might. If you know some-
one's failings, just forget
them because you know that
same fellow has some good
points—they are the ones you
want to show. Cast your
loves upon the water, "they
will come back"; an adage true,
maybe too, they will come back
buttered, when some one boost-
es you.

WESTERN CANADA'S GROWTH

It may be of interest to know
something concerning the per-
centage of increase as shown by
Western Canada in 1911, and to
have some idea of the prospect
for additional increase during
this year.

Trade increase as indicated by
collections, 33%; bank clear-

ings, gain, 27½%; building operations
greater than in 1910, 50%;
rate of city population increase
in 5 years, double; rate of town
population increase in 10 years,
treble; Western Canadian popula-
tion increase in 10 years,
17½%; average general increase
in all lines about 40 per cent.

J. Bruce Walker, Immigration
Commissioner of the Dominion
of Canada, states that in
this year is his opinion to be
that Canada has made great
progress in immigration and development.
He is in receipt of statistics
which show that a larger number
of immigrants have entered
Western Canada, both from
United States boundary points
and by way of ocean ports, than
ever before in the same period
of the immigration movement.
These people have also brought
in a greater amount of live
stock, implements, household
goods and cash than ever before.
The recorded wealth brought
into Western Canada by people
from the United States alone
during 1911 amounted to over
\$100,000,000 and the recorded
number of settlers during 1911
from points in the United
States alone ran over 131,000.

The liquor trade is having no
easy time in Ontario just now—
sort of between the devil and
the deep sea. The Liberal party
has come out for the abolition
of the bar and the Conserva-
tives propose to abolish
the treating system and make
treating an offence. The Repre-
sentative, Leduc.

No less than forty-seven new
townships on the Grand Trunk
Pacific are to be put on the
market this year. Forty-five
are to be surveyed and placed
on the market in 1913.

The financial committee has de-
cided not to issue silver dollars
for the present. The late gov-
ernment passed an act authorizing
their issue. The coining of
five and ten dollar gold pieces
will be proceeded with, though
they are not expected to replace
paper money to any extent.

Accompanying Andrew Carnegie's
check for \$5,000 to Mayor
Gaynor of New York for the
aid of the Titanic sufferers
was the following telegram:
"What was the Titanic doing
up among the ice when she hit
the whole Atlantic ocean south
open and free? This is
the root of the matter. Pass-
enger steamships should be
compelled to keep far south
below the range of icebergs all
seasons. Lifeships are sec-
ondary to this vital require-
ment.

(Signed)
"ANDREW CARNEGIE."

RHODE ISLAND REDS.

Breed Just Now Riding High on Wave of Popularity.

Among the most popular claimants for avian supremacy of the climes are the Rhode Island Reds.

They receive their name from the state from which where they have been bred for a number of practical purposes. Recently, however, more attention is being paid to the perpetuation of the pedigree.

They are believed to be the original from crosses of the Asiatic, Mediterranean and Game. The former gives them size, the Mediterranean contributes to their color and the Game to their hardiness and color.

Rhode Island Reds have been considered a little difficult to breed, as to colors, but with care, experiments may now be found in any case full fander's yards.

The following qualities are not dependent upon the color of the feathers, but if one wishes to combine the use of the fancy some consideration must be given to the coloration of the specimens. The color should be solid red, though a little white will not disqualify. An entire white feather in the plume is a serious defect. The feet and shanks should be

PRIZE WINNING RHODE ISLAND RED HEN

a reddish brown in color. The eyes should be rather prominent and red in color. The comb and wattle should be a brilliant red, with red undercolor; wings red, with lower web of feathers mostly black.

When the wing is folded none of the black should appear. The back should be red, with red undercolor. The tail feathers should be black, with greenish black; breast red, with red undercolor. The entire surface of body should be red, and brunito, a color of red, not possible-free from mottled appearance.

The female is in color almost like the male, though not as gaudy and has a few black feathers. She may have a slight tickling at end of her tail. Colors red, with undercolor red, and the tickling black.

One of the most points to be desired is the proper undercolor, which should in all cases be red. Beware of smutty undercolor. It is a dead give away.

The Rhode Island Red is the purest pose fowl. They are among the best of layers, sit and hatch their own eggs, are excellent table fowl, and the present moment are riding high on the crest of the wave of popularity.—FARM PRESS.

Do not, for the sake of the son and those who will be dependent upon it after you, burn the weeds, stubble and garbage.

Turn the weeds, stubble and garbage and let them be converted into humus, which is so essential for the soil. It is progressive and not retrograde.

A rose tree breathes through its leaves. In dusty weather, therefore, the plants should be kept clean with frequent sprays.

The best soil for roses is two-thirds loam and one-third manure. This soil should be at least eighteen inches deep.

Carried up leaves mean a maggot is at work. Should be caught and killed at once or it will be too late.

The roses should be pruned in the early morning or at sunset.

Mix gunpowder with the rose trees when it is in bloom.

Roses should grow roses from seed.

It takes too long.

Rose beds should not prepared in very weather.

Never plant a rose tree to a windy place.

Rose bushes should be sprayed daily in May.

Remember that from north do not thrive.

—Home and Farm

German Farmers' Economy.
The German farmers are installing drying systems for beet and potato leases, which contain a large amount of water. By these installations it is calculated that a saving of \$12,000,000 a year can be effected, while in practice the economy of sugar beets may be \$5,000,000 worth of cattle feed from other countries. The dried leaves are wetted again just before being fed to the cattle.—Electric Beetles.

HOG NOT DIRTY BEAST.

Given Hogs a Chance It Will Keep Itself Clean and Healthy.

Cholera, parasites and pneumonia are some of the worst troubles hog breeders have to fight. This kind of hog is the most popular as they are called community, are always with the hog house or less. It will be the most popular choice, as the swine industry according to Dr. W. H. Schmeier, state veterinarian of Kansas, reported in the Kansas Industrial Review, before the breeders will be able to get the most out of pigs.

Pneumonia may be prevented by keeping the hogs from getting cold.

Parasites are the foundation of successful hog raising. A hog should be provided for prevention and thorough treatment.

Every two or three years the hog should be given a thorough treatment.

A hog isn't likely to be healthy.

If given a chance it will keep away.

The hog is the foundation of successful hog raising. A hog should be provided for prevention and thorough treatment.

Every two or three years the hog should be given a thorough treatment.

A simple remedy for worms is a mixture of water, salt and oil.

It won't do the hogs any injury if allowed to eat all they wish.

This mixture will help also to tone the system.

STUDY IN FARM ECONOMICS.

A wise man once wrote: "Just stop a moment and consider carting a ton of hay fifteen or twenty miles to market or feeding it upon the farm. It is a waste of time of utter to market. They are about equal in value, and note the difference in carriage."

GET OUT THE STUMPS.

Simple Device whereby You Can Rid Your Field of the Inconveniences.

A correspondent of the Iowa Home-News sends the accompanying illustration and description of a simple stump puller to save time and labor.

It consists of a wooden frame, mesquite trees on the banks of the Rio Grande.

The frame is very simple and may be made by one man, and two men may pull out the roots a very large tree.

As shown the frame is composed of a single tree, which is driven into the ground.

Two swivels are attached at either end, a two inch hole is formed in the trunk of the tree, and a wooden bar is placed upon which the tool is operated.

STUMP PULLER.

From the Iowa Home-News!

Ropes, chains or wire cables are made fast to the frame and tree, and these are then fastened to the swivels at A. A. The tool is then turned with a handspike and something has to come or break. The tool is then turned again to make this tool at slight cost, yet it would be very ready to have out the stump. Where one or two stumps are fastened, others should be driven into the ground, as the force gained by turning the tool is rather slow one can do more to help out with an as by cutting away any loose roots.

Shearing the Sheep.

Do not shear sheep sharply, as a few hot days in May will not make them suffer as much with their wool as

WEANING THE SPRING CALVES.

Several of the most deadly calf illnesses are due to infections of the udder before it heels. The utmost cleanliness at calving time, coupled with disinfection is therefore necessary, says a correspondent of the Iowa Home-News.

A calf should be received on clean straw and the udder string, after being tied with cord that is clean and dry.

When the calf is taken away at once, it is the practice in some dairies, to wash the udder thoroughly until it is clean and then to dry it.

A hog isn't likely to be healthy. If given a chance it will keep away.

The first feed given to the calf is the milk of its own dam or, if this is not available, to a nursing mother.

The first milk is quite different from ordinary milk.

Give the calf a few drops of water.

It is a mistake to think that you are saving feed by cutting down the calf's ration. The best way is to make her eat all that she can eat profitably.

Salt the Calf. Save the Harness.

A farmer writes who keeps his rats from gnawing the harness by keeping a lump of salt where they gnaw at the harness. He says it is the salt that they gnaw the harness and that it may they gnaw the harness.

For the Farmer Who Thinks.

Irrigation will bring maximum crops while the land is new and full of plant food, but when the crops are sold year by year, the soil becomes poor.

The best way to keep the soil in good condition is to use manure.

The Jersey is the most refined in build of all cattle. The legs are fine and compact, like that of the deer.

The head is fine, with a dished face and large, prominent eyes.

The Jersey is free from the缺点 of the cow, having a thoroughbred and compact body, the liver of the animal is in abundance and the withers are thin at the setting on of the neck. The back is well developed and the hind legs are very broad in proportion to the body.

The Jersey is well built and very generally endued with the characteristic, combined with the ability to give the most of milk.

The Jersey cow is the most popular in the United States, according to the University of Wisconsin, the Jersey containing 60 pounds of butter fat.

And it is nature's special provision for the calf. This is the case, which is sometimes the case, an efficient milking of dairy cattle can be obtained by keeping the calf on a pint of milk for the first week of the calf should get the milk of its dam, for about a week, after which the calf should be given the fifth milking of the milk for dairy purposes, the milk is often very good, and is often normal for five or six days after birth.

The best way to boil the milk, if it will not curdle, is to boil the milk for a short time, without curdling it for dairy purposes; otherwise it is not good.

It is a good idea to skin-milk within two or three weeks, but my personal choice is to feed whole milk until the calf is at least one month old.

When the calf is one month old it

is to graduate with each increase of separated milk, a corresponding quantity of new milk being drawn.

With the first increase of separated milk some addition must be made to the feed to compensate for the cream that it will contain.

It is a good idea to boil the milk, if it will not curdle, is to boil the milk for a short time, without curdling it for dairy purposes; otherwise it is not good.

It is a good idea to skin-milk within two or three weeks, but my personal choice is to feed whole milk until the calf is at least one month old.

TRROUBLE IN SIGHT.

Steam Tr. -ers Gaze Cimation In Fisheries.

A condition is rapidly developing in connection with the possibilities of various international complications. In the last few years steam vessels have been invading the waters used by the fishermen of Newfoundland and Nova Scotia. Newfoundland and the Nova Scotia fishermen in these craft caught few fish in Wester waters and were regarded with alarm by those who were in a position of influence that the methods of fishing used were extremely dangerous. The North Sea was given to the steam trawlers, who have come over in increasing numbers, and have already proved their ability to adapt themselves to conditions under which they make catches. Now it is contended that their operations are ruining the fishing grounds of the Atlantic. This has been started in the fishing ports of Nova Scotia, New England and Newfoundland, with very little influence on the Governments. I therefore call for the action leading to the consumption of the fisheries of the North Sea, prohibiting the employment of this type of fishing craft on the banks of the Atlantic. The Canadian Government has already prohibited the use of the trawler trawl in our waters. The fishermen of Nova Scotia are now asking that a regulation be adopted preventing the use of trawlers in the waters of the provinces in Canadian ports. That would be a rather large order for the Government to make, but the English steam trawlers have from England and others from France, and it would be a small step to prohibit the use of these vessels of the Mother Country and France the ordinary privilege of buying and selling fish. In this case such a drastic measure would not achieve its purpose so far as the English are concerned, but the French can use St. Pierre and Miquelon as a base of operations without any such regulation.

In Gloucester, it is said owners of fishing vessels have pledged themselves to raise \$10,000 to help the invasion of beam trawlers and in Lunenburg and other Canadian fishing ports feeling much alarm and have taken steps to prohibit such large public meetings, promising the Minister of Marine all sorts of trouble if he did not take action. I hope that other nations to agree to prohibit beam trawling.

As far as our fishermen following the old methods of fishing are right or not in their fear that the beam trawlers will be able to capture all the fish, they have good reason to fear the results of the extensive employment of beam trawlers. The beam trawlers are labor saving machines. Their competition will drive the fishermen into the ranks of the building of wooden fishing vessels will cease, and ruin will fall upon a number of families. This will be a heavy blow to the fishing industry. The business of handling fish will be greatly increased and the existence of hundreds of hamlets along the coast, now people by themselves, will be menaced. A certain proportion of fishermen will remain, but the number will be less, but they will be more wage earners—without as now a half interest in the vessel. The number of families may make fortunes, but the fishing industry will support only a small number of families. This will not give a good livelihood from it. And with the passing of the fishing schools, the number of men who are fit to be seafarers in the world, a herdy, vigorous race, self-reliant, turned to hardy—these traits which an engine in its time of trouble might give to draw men to man its fighting ship—Colin McKay in Montreal.

Mail Can't Wait.

His Majesty's mail has quite a task in getting to the post offices. The drivers have power to requisition aid of any kind to avoid delay in deliveries, and Clinton, the Postmaster, has an interesting experience to show how this is sometimes done.

As a member of a hunting party he was once driven one day over one of the insurmountable bad roads of Northern Ontario. The driver of the mail wagon he was taking it to a place called South River.

Clinton is a big man, and his body was as big as many have been the cause of the trouble which occurred. Any-

way, one of the horses gave out, and the mail wagon was left behind.

Clinton said, "I'll bring it back if they were going to be stranded for days in the wilds."

The driver didn't take that

view at all. Happening to be near

the home of a settler, he simply went

up to the house, led the mail

wagon to the door, and put it in

the house. The mail wagon

was left behind.

"Here," he shouted, "what in

blazes are you doing? Put that horse

back quick or you'll be in

trouble."

"I won't pull the horse and there's

no time to lose," he said.

"I'll get to the mail as fast as

possible," Clinton said, "I'll bring it

in the morning."

South River the mail went

with the settler's best horse making

one of the team which took it. The

driver was quite in his rights.

Highly Unnecessary.

So much is said in the methodical following the regular form of Parliamentary expression and procedure than Hon. T. S. Sprague, the present Minister of Marine, has been doing.

When the House adjourned the other

morning shortly after one o'clock, Mr.

Sprague came into the House and

his three-cornered hat and gravely

declaring, "This House stands ad-

vised until the morning."

This does not appear to be the Speaker's fault

as certain members forget or neglect the morning adjournment.

To Every Grain Grower Interested in

HAIL INSURANCE

This Advertisement Carries An Important Message

When making your plans for the coming crop season, the common enemy of all Grain Growers, "The Hailstorm," must be considered. That protection against loss from this destructive element is necessary, is no longer questioned by the Prudent and Progressive Farmer. In the selection of a Company to give you that protection do not experiment.

Your Insurance may be All You Have Left of Your Crop

and it is of vital importance to know: That the Company in which you are insured has successfully and satisfactorily carried on Hail Insurance in Saskatchewan for a number of years and that they have a record for fair treatment of their Patrons, and prompt payment of claims. The companies we represent measure up to the standard on these most essential points.

Their Record for Fair Dealing and Prompt Payment of all Loss

Claims is Firmly Established with Hundreds of Satisfied Claimants.

We Represent the

**Alberta Canadian Insurance Co., and
The Western Canada Insurance Co.**

They Insure your Crop from Two to Ten Dollars per Acre; the rates are from 4½ per cent. up. Do not be misled by the Agent who tells you he has something just as good. Get the Facts.
